

Which customer has paid the most standard total amount over time?

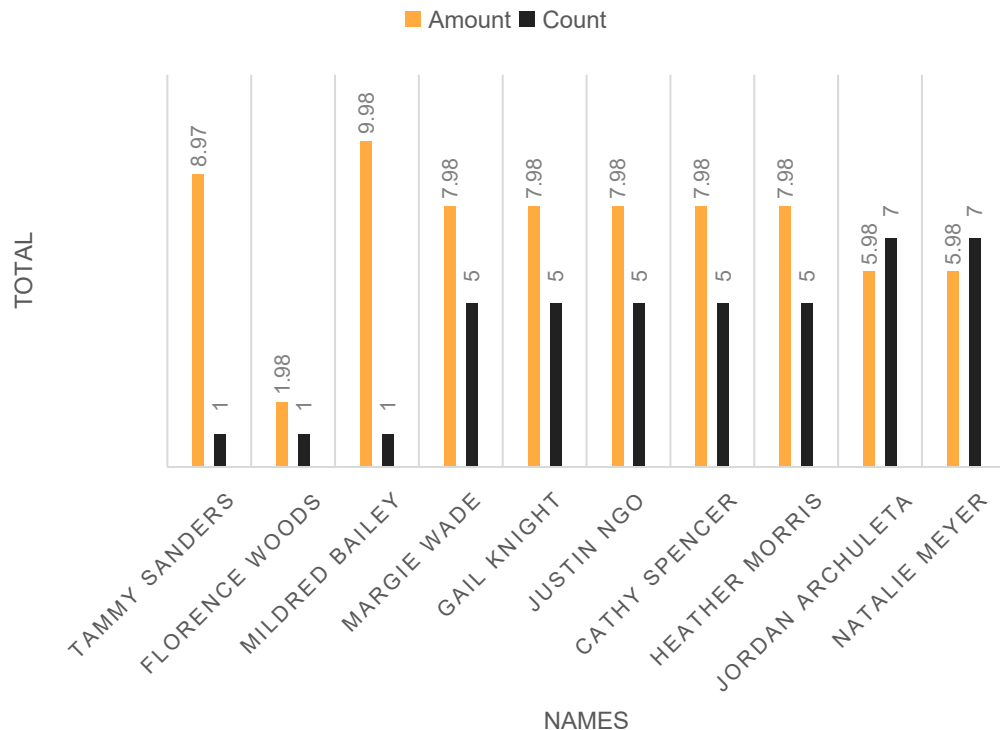

The histogram displays top 15 most total standard amount paid by customers over time.

It can be observed from the chart that Eleanor Hunt paid the most standard amount than any customer . Hunt paid the standard total amount of 211.55.

What is the least top 10 amount of payment made by customers in terms of count?

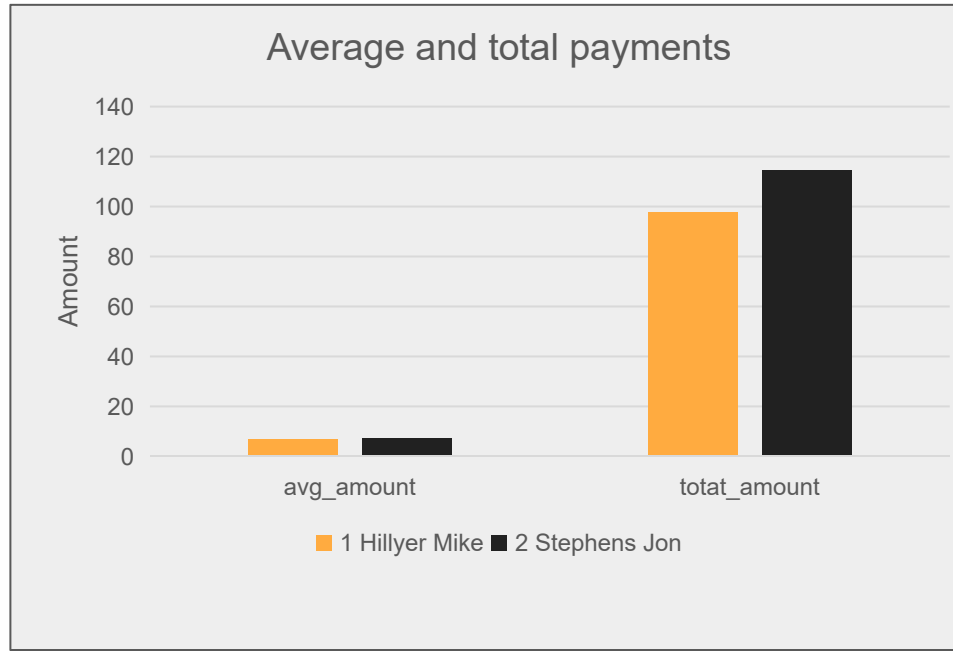

AMOUNT AND TIMES PAID

The graph displays the top 10 least amounts and number of times they were paid. It can be observed that 8.97, 1.98 and 9.98 were the paid once by Tammy, Florence and Mildred.

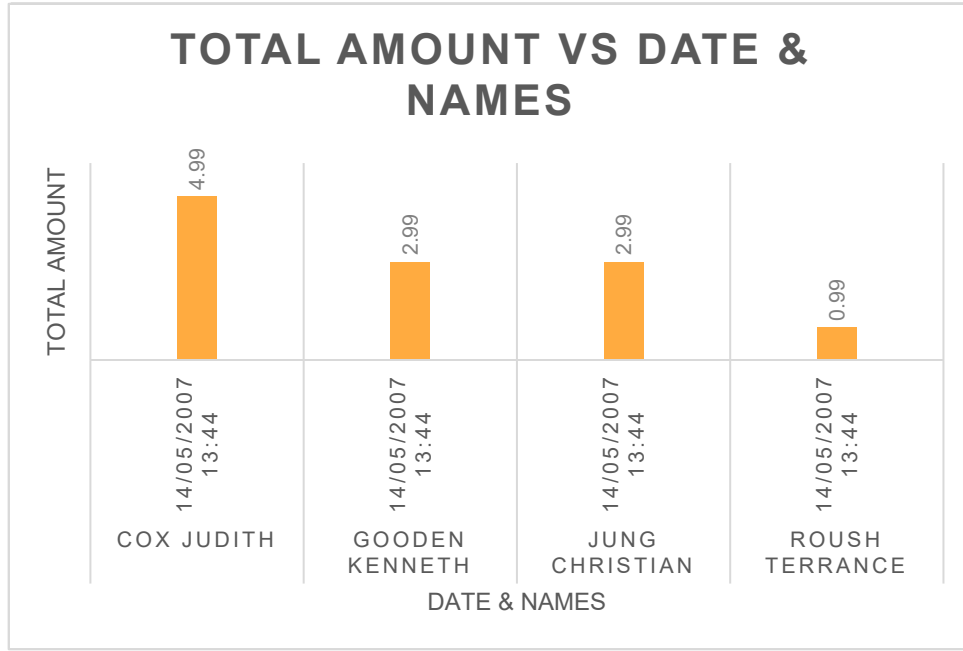

It then follows that 7.98 was paid five times as shown on the graph and it is followed by 5.98 which was paid seven times.

Show together the store id and full names of the stuff, show the average and total amount payed at each store.

The table shows that store two where Stephen is working received the highest amount of payment than that of store one where Hillyer is selling. It can be said that store two performed better.

Show all names of unactive customers who made payments in the last day as the last customer who made a payment and the sum total amount of payment they have made.

The graph clearly displays there are four customers that made a payment as the last customer who made a payment. The last day was on 2007-05-14.

It also displays the total amounts each inactive customer has made.
